To: Residents and Property Owners
Winston Drive Water Main Improvements Project

Dear Resident and/or Property Owner:

On behalf of Mayor Ronald Serpico, I am pleased to inform you that the Winston Drive Water Main Improvements Project construction phase will begin the week of August 31st. The project is located on Winston Drive from 9th Avenue to 5th Avenue. Bluewater Construction is the contractor in charge of construction.

The project consists of the installation of new water main; installation of fire hydrants and water service transfers to the new water main. Restoration of curb and gutter, sidewalk, driveway pavement, and roadway pavement will be completed in the Fall by a Village contractor once all water main work is completed.

At times during the water main installation water service will be interrupted for the transfer of services. A notice will be handed out prior to this work taking place. Additionally, we will knock on your door prior to the shut-off taking place and again once the water service has been restored.

This project is anticipated to be completed by mid-November. Garbage pickup will not be affected.

No parking signs will be posted by the contractor in areas where parking limitations will occur. Traffic flow will be always maintained. Please follow the direction of flaggers in construction zone area. Temporary delays in traffic are expected. At times, access to driveways will be removed while the water main is installed. The contractor will work quickly to minimize the disruption and will knock on your door prior to removing access. Notices of disruption to driveway access will be distributed 24 hours in advance. Please do not hesitate to reach out to us if you have any questions or immediate concerns during the project regarding driveway access. The road will be fully open to traffic at the end of each day.

I realize that you will encounter inconveniences during this project, and I thank you for your patience and understanding. If you should have any questions, please feel free to contact the Engineer, Rob Prohaska 708-240-0549, or myself at 708-343-5128.

Sincerely,

Mike Carpanzano
Superintendent of
Sewer and Water
